Hi Caroline,

Can you send Bonnie and me the responses you sent to Ken, please? I have the tweaked version you sent yesterday afternoon which doesn't include the response to Q #9. Thanks.

Bonnie – I'll check with front office on the Hopey inquiry.

Terri - Will you please send me the responses you sent to Ken Ward? Referenced below.

We still have not responded to Don Hopey. Helen sent a draft response to RA LAST Friday. I've checked but need your help -- Can we please wrap our response today?

Subject: WV spill-related tweets - morning of Friday, Jan. 24, 2014

From WV DHSEM, Larry Messina, Dave Boucher, Ken Ward, Jr., American Rivers & others.

Kenwardjr @Kenwardjr - BREAKING: Just received response from EPA to questions about WV chemical spill -- questions I posed to them on Jan. 15...

Lawmakers should ask if fact that Freedom now says they mixed chemicals means they needed a different, additional permit than they had.

@chemsafetyboard presents at Water Resources Comm 9am Senate Judiciary 208W. Come!!
Or listen live at <http://bit.ly/1eJY0Tz>. @Kenwardjr

However, state officials tested at a 2 parts per million level. As in, any amount of PPH less than 2 ppm would not be detected

RE: #vwwatercrisis - re-testing of prior samples finds no detectable levels of #PPH; findings indicate no health risks per @CDCgov.

@Sen JoeManchin says Freedom Industries site needs to be "torn down"

I know it's been 14 days since a chemical leaked into the Elk and my tap water still smells funny

Newest numbers for #WVWaterCrisis -533 patients seen at 10 hospitals -26 hospitalized at 6 hosps. Both up 30% since last data on Saturday

Why is the testing limit for PPH 2 parts per million, if it's 0.01 parts per million for Crude MCHM? Just different science? #wvchemleak
